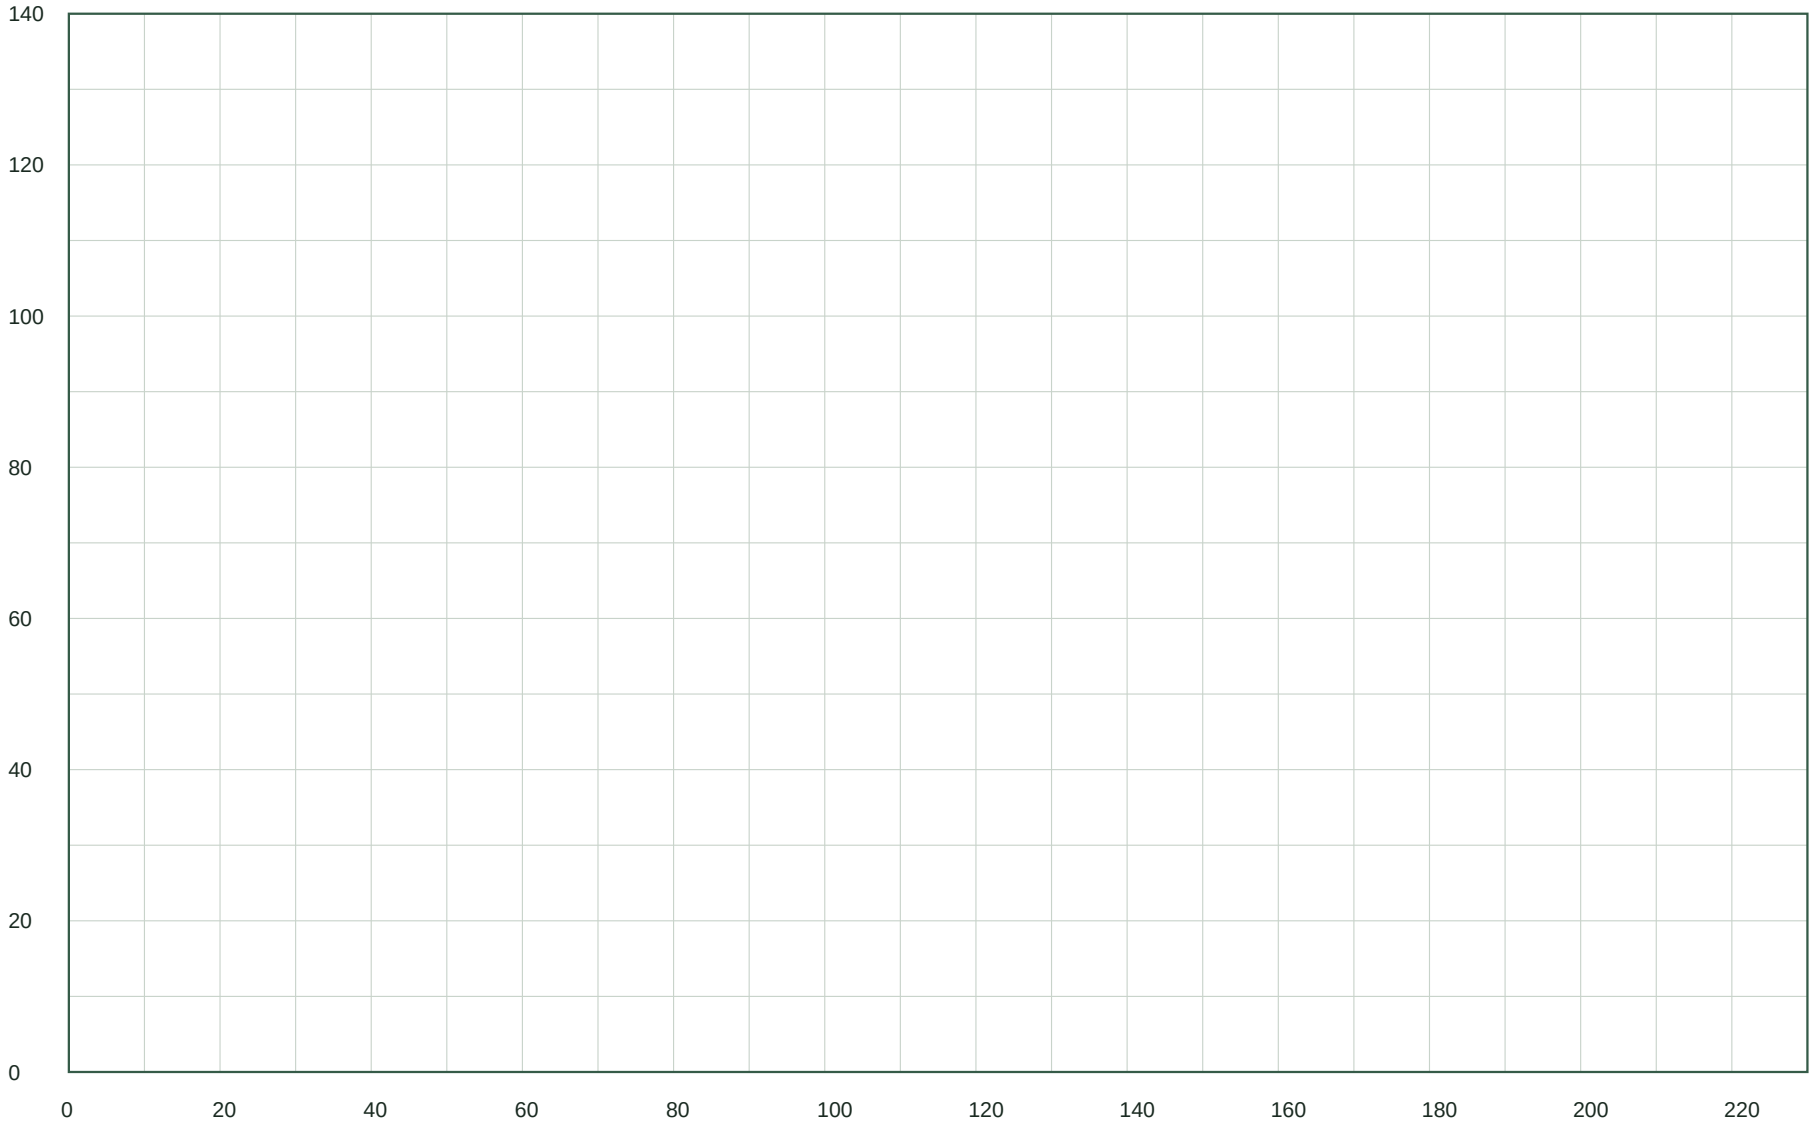
Draw your desk

Check bar: exactly 5 cm

One square on this sheet represents 10 × 10 cm on your desk. Mark the front edge and anything that blocks access.



Centimeters on the full-size work surface

Print at 100% or Actual size. Check the bar with a ruler before measuring.

Make your gear pieces

Check bar: exactly 5 cm

Draw each item to the same scale, including its connected plug and cable. Label, cut out and move the pieces on your desk drawing.

Try one real task

Play a chord and reach the interface. Frame a small object on camera. Or clear a landing place for a finished print.

What collided? _____ What moved? _____

Example: a 30 cm keyboard depth spans three squares. For a 120 × 60 cm desk, mark twelve squares by six on page one.

Print at 100% or Actual size. Check the bar with a ruler before measuring.
